**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/14/2011 has been entered.

2. The Remarks and Petition for Time Extension filed by Applicant on 12/14/2011 have been entered.

3. Claims 8 and 10-13 have been canceled.

***Response to Amendment/Arguments***

4. Applicant's amendment and arguments filed on 12/14/2011 have been fully considered and they are found unpersuasive.

5. The rejection of claims 1-7, 9 and 14-25 under 35 U.S.C. 103(a) as being unpatented over Waki et al., U.S. Patent

Art Unit: 1762

No. 7,008,994 (hereinafter "Waki") in view of Sano et al., EP 1 153 992 A1 (hereinafter "Sano") is withdrawn.

***Allowable Subject Matter/Reasons for Allowance***

6. Claims 1-7, 9 and 14-25 are allowed.

7. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Waki and Sano. Waki teaches an aqueous pigment dispersion, process for producing the same, and water-based ink. See Waki, Abstract; col. 2, line 58 through col. 3, line 21. Waki teaches a process comprising kneading a mixture containing a styrene-(meth)acrylic acid resin, a pigment, a high-boiling solvent followed by dispersing the mixture in an aqueous medium. See Waki, col. 3, lines 58-67; Example 1-2. The resin has an acid value of 30-300 and Mn 2,000-20,000. See Waki, col. 4, line 21. Waki teaches the use of several pigments described in the claimed invention. See Waki, col. 4, lines 37-67. In example 1, the resin is a styrene-acrylic acid copolymer with a styrene-acrylic acid weight ratio of 88/12 wherein the copolymer is expected to have a  $T_g$  higher than 90 degrees Celsius since the  $T_g$ 's of styrene homopolymer and acrylic acid homopolymer are both much greater than 90 degrees Celsius. Waki further teaches

Art Unit: 1762

solvent comprising humectants. See Waki, col. 7, lines 16-29. The resin is neutralized with an organic amine during or after the kneading step. See Waki, col. 5, lines 53-67. Waki further teaches the use of planetary mixers for kneading. See col. 5, lines 42-47. The pigment dispersion is used in numerous formulations including coating and inks wherein the coatings and inks include ink-jet ink. See Waki, col. 10, lines 34-67; col. 11, lines 1-17. Sano (see page 5, [0027]) teaches the use of alkali metal hydroxide to neutralize a styrene/acrylic resin.

8. The present invention differs from Waki and Sano in that the present invention has improved storage ability, which can be obtained without cross-linking. The improved storage stability is obtained by adding an alkali metal hydroxide as the basic compound in the kneading step. Waki does not disclose nor suggest of the claimed invention at all which the alkali metal hydroxide as the basic compound is added in the kneading step and the resulting mixture is kneaded such a high solid content percentage of the colored kneaded product. One of ordinary skill in the art would not be motivated to combine the references of Waki and Sano because Sato teaches a resin made to gel and Waki teaches a technical concept involving a thermoplastic resin maintained in dispersion.

9. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Waki and Sano to render the present invention anticipated or obvious to one of ordinary skill in the art.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
